FINANCIAL RESULT APRIL-JUNE 2021

Pro forma compared with Ahlstrom-Munksjö April-June 2020

The pro forma figures illustrate as if the acquisition of Alstrom-Munksjö had been completed in the beginning of 2020.

Net sales increased by 21.8% to EUR 757.3 million (621.5). At constant currency rates the increase was 25%, mainly driven by higher delivery volumes. Sales volumes rose in nearly all businesses as customer activity continued to increase across the broad range of end uses the company serves and was partly driven by restocking.

Comparable EBITDA increased to EUR 95.8 million (74.0), representing 12.6% of net sales (11.9). This was driven by significantly higher sales volumes and an improved product mix.

The comparison period was characterized by exceptional market conditions due to the pandemic, which negatively affected sales volumes.

Variable costs were reduced by the company's on-going cost efficiency measures, but were nevertheless higher due to the rapid increase in raw material costs. As a result of the rebound in economic activity, demand for raw materials and logistics has increased, leading to price increases and tightness in supply.

Fixed costs were higher compared to the exceptionally low level in the comparison period, which was impacted by temporary measures to cushion the financial impact of the decline in volumes.

Adjusted EBITDA amounted to EUR 454.3 million for the last twelve months (LTM) ending June 30, 2021 (EUR 453.1 million LTM ending March 31, 2021). Improved comparable EBITDA during the reporting period reflects partly diminished Covid-19 impact and the realization of some of the expected savings from the FY 2021 initiatives.

Reported April-June 2021

The margin on variable costs (MOVC) was EUR 699.6 per ton and was mainly impacted by an increase in variable costs.

EBITDA was EUR 77.6 million. Items affecting comparability (IACs) and owners' management fee in EBITDA totaled EUR -18.2 million, and included mainly transformation costs related to the acquisition of Ahlstrom-Munksjö Oyj.

The operating result was EUR 32.6 million. Depreciation, amortization and impairment amounted to EUR -45.1 million, including depreciation and amortization arising from PPA of EUR -16.9 million.

Net financial items were EUR -24.8 million. This figure includes net interest expenses of EUR -22.0

million, a currency exchange gain of EUR 0.4 million and other financial expenses of EUR -3.1 million.

The result before taxes was EUR 7.8 million. Taxes amounted to EUR -2.1 million. The net result was EUR 5.7 million.

Pro forma compared with Ahlstrom-Munksjö January-March 2021

Comparable EBITDA decreased due to higher variable costs, which was to a large extent mitigated by higher selling prices and increased sales volumes. Fixed costs increased somewhat mainly due to a high production level.

IMPACT ON CUSTOMER ACTIVITY

Within Ahlstrom-Munksjö's broad range of advanced fiber-based solutions, the impact of the pandemic on customer activity has varied.

Demand for healthcare and life science related products has been strong throughout the pandemic. In the second quarter 2020, demand decreased clearly in the home building and furniture, transportation and industrial end-uses. In the third quarter, demand recovered in home building and furniture, driven mainly by increased household furniture spending, as well as transportation end-uses. Toward the end of

the year, demand for industrial-related products improved. Overall demand for consumer goods-related applications, of which food and beverage and packaging represent the largest share, remained relatively stable.

The surge in the number of infections since the end of 2020 caused countries to reimpose restrictions, but these lighter and more regional lockdowns have not had a material impact on demand in the beginning of 2021.

ACTIONS TO MITIGATE THE NEGATIVE FINANCIAL IMPACT IN 2020

For Ahlstrom-Munksjö the financial implications of the pandemic was relatively limited in 2020. Ahlstrom-Munksjö took numerous actions across the organization to cushion the financial impact of the decline in delivery volumes. Savings from these actions were approximately EUR 24 million in 2020.

The company had no on-going short-term saving actions related to Covid-19 in the half of 2021.

SHORT-TERM RISKS

As Ahlstrom-Munksjö Holding, through Ahlstrom-Munksjö, manages a broad portfolio of businesses and serves a wide range of end uses globally, it is unlikely to be significantly affected at a group level by individual business related factors. However, slowing global economic growth and uncertain financial market conditions could have an adverse effect on the financial results, operations and financial position.

The coronavirus pandemic has been the key driver of increased uncertainty globally from an economic and social perspective. However, the risk of a broader economic downturn is less tangible. Globally, the rollout of vaccinations are ongoing and is expected to contain the spread.

The coronavirus pandemic has disrupted consumers' lives across the world. The length and severity of the pandemic will probably be a key determinant for if and how way consumers life will permanently change, as well as affect future business opportunities.

Ahlstrom-Munksjö has assessed carrying amounts of assets and liabilities, such as goodwill and other intangible, tangible assets, inventories, deferred taxes, trade receivables and pension plans and re-assessed the need of impairment. Based on the assessments, the consequences of the pandemic has currently no impact on asset valuations.

The company's significant risks and uncertainty factors mainly consist of developments in demand for and prices of sold products, the cost and availability of significant raw materials and energy, financial risks, as well as other business factors including developments in global politics, regulations and the financial markets.

As a result of the rebound in economic activity, demand for raw materials has increased, which has led to price increases and tightness in supply in some raw materials. Operational risk relating to employee absences due to quarantine and infections has been mitigated by the implementation of the Ahlstrom-Munksjö Covid-19 Safety Protocol.

The Group's key financial risks include interest rate and currency, liquidity and credit risks. To mitigate short-term risks, methods such as hedging and credit insurance are used. The company has not identified in its assessments any significant increase in the amount of bad debt, and there has currently not been any significant change in payment delays related to Ahlstrom-Munksjö's customer receivables. Exposure to the credit risk, such as delayed payments from the customers, has decreased as the pandemic is gradually being contained.

The Group is exposed to tax risks due to potential changes in tax laws or regulations or their application, or as a result of on-going or future tax audits or claims. The company regularly assesses the best structure for its platform of businesses and systematically evaluates M&A opportunities. In potential business combinations, substantial integration work is needed to realize expected synergies. The company has operations in many countries, and sometimes disputes cannot be avoided in daily operations. The company is sometimes involved in legal actions, disputes, claims for damages and other procedures. The

result of these cannot be predicted, but taking into account all the available current information, no significant impact on the financial position of the company is expected.

The pandemic has increased the risk of financiers becoming more cautious and reducing banks' willingness to provide financing. This may have an impact on refinancing and increase financing costs. There are no major short-term refinancing needs.

The condensed interim consolidated financial statements ("interim report") January-June 2021, approved by the Board of Directors of Spa Holdings 3 Oy have been prepared solely for the purpose of reporting to the parent company's bondholders. The condensed consolidated interim results, financial position and cash flows of Ahlstrom-Munksjö Holding for January-June 2021 and for the year 2020 presented herein have been prepared in accordance with IFRS, as adopted by the EU. The condensed interim consolidated financial statements have been prepared in accordance with "IAS 34 Interim Financial Reporting", as adopted by the EU.

The condensed interim consolidated financial statements are presented in millions of euros and consist of the consolidated income statement, the consolidated statement of comprehensive income, the consolidated balance sheet, the consolidated statement of cash flows, the consolidated statement of changes in equity, and the explanatory notes. All figures in the interim report have been rounded and consequently the total of individual figures can deviate from the presented totals. Furthermore, all percentages are subject to possible rounding differences.

The parent company was incorporated on September 9, 2020 solely for the purpose of executing the public tender offer for the shares in Ahlstrom-Munksjö and accordingly, it was not engaged in business activities other than arranging for equity and debt financing to consummate the tender offer. The parent company has prepared its first set of statutory financial statements for the period from incorporation to December 31, 2020 in accordance with IFRS. Prior to the completion of the tender offer and acquisition of Ahlstrom-Munksjö on February 4, 2021, the parent company founded a subsidiary SPA US Holdco, Inc in the US and accordingly, this interim report is the second consolidated set of financial statements prepared by the

company. Considering the lack of operating history for the company these condensed interim consolidated financial statements include historical financial information of Ahlstrom-Munksjö as comparative information (titled Ahlstrom-Munksjö).

When comparing the results of Ahlstrom-Munksjö Holding in January-June 2021 and Ahlstrom-Munksjö's in January- June 2020, Ahlstrom-Munksjö's income and expenses have been included in the consolidated financials of Ahlstrom-Munksjö Holding on and forwards of February 4, 2021 which is the date of Ahlstrom-Munksjö Holding acquiring control over Ahlstrom-Munksjö. Accordingly, the income statement disclosures in this interim report omit comparative information due to lack of comparability.

3. Accounting principles

The accounting principles applied are consistent with those followed in the preparation of the Ahlstrom-Munksjö audited consolidated financial statements for the year 2020 except for the following items:

Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates, are generally recognized in profit or loss. They are deferred in equity if they relate to qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investment in a foreign operation.

Net investment hedges

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognized in other comprehensive income and accumulated in reserves in equity. The gain or loss relating to the ineffective portion is recognized immediately in income statement within net finance items. Gains and losses accumulated in equity are reclassified to income statement when the foreign operation is partially disposed of or sold. Ahlstrom-Munksjö Holding may use non-derivative financial instruments such as foreign currency borrowings to hedge foreign currency risk on net investments in foreign operations. Derivative instruments are not allowed to be used to hedge this risk.

Redemption liability

For accounting purposes, the public exchange offer (comprising of the initial and the subsequent public exchange offer) and the mandatory redemption proceedings for the minority squeeze-out are treated as linked transactions and accounted for as one single transaction resulting in Ahlstrom-Munksjö Holding consolidating 100% of Ahlstrom-Munksjö at the acquisition date when Ahlstrom-Munksjö Holding reached the 90% threshold in voting rights. Accordingly, Ahlstrom-Munksjö Holding recognized a redemption liability as a short-term liability to reflect the obligation to redeem the non-controlling interest.

Management estimates and significant judgement - fair value measurement (PPA)

The application of the acquisition method requires certain estimates and assumptions to be made, especially concerning the fair values of the acquired intangible assets, property, plant and equipment and the liabilities assumed at the acquisition date, and the useful lives of the acquired intangible assets and property, plant and equipment.

Measurement is based to a large extent on anticipated cash flows. If actual cash flows vary from those used in calculating fair values, this may materially affect the Group's future results of operations. In particular, the estimation of discounted cash flows for e.g. customer relationships, technology based assets as well as trademarks and trade name are based on assumptions concerning, for example:

- Assumptions related to long-term sales projections and margin development
- Determination of appropriate discount rates
- Estimates related to customer retention rates
- Estimates related to appropriate market based royalty rates

For significant acquisitions, the fair valuation exercise on the acquired assets and assumed liabilities is carried out with assistance from independent third-party valuation specialists. The valuations are based on the information available at the acquisition date taking into account the provisional adjustment period allowed under IFRS of 12 months.

For more information see note 4 Business acquisitions and disposals.

Cloud computing arrangements

IFRS IC finalized in April 2021 its agenda decision Configuration or Customization Costs in a Cloud Computing Arrangement (IAS 38 Intangible Assets). In this agenda decision IFRS IC considered, whether, applying IAS 38, the customer recognizes an intangible asset in relation to configuration or customization of the application software, and if an intangible asset is not recognized, how the customer accounts for the configuration or customization costs. IFRIC agenda decisions have no effective date, so they are expected to be applied as soon as possible. As the Group has cloud computing arrangements in place, it has started to analyze, if this agenda decision has an impact to the accounting policies applied to implementation costs in cloud computing arrangements. The Group will undertake this analysis during the fall 2021, and the possible impacts will be implemented retrospectively in the financial statements 2021 at the latest.

4. Business acquisitions and disposals

Ahlstrom-Munksjö Holding commenced the voluntary public cash tender offer to acquire all of the issued and outstanding shares in Ahlstrom-Munksjö Oyj on October 22, 2020. 19. Financial risk management

Group's financial risks consist of credit risk, funding risk, liquidity risk and market risks. Market risks are further divided to currency risk, interest rate risk and commodity risk.

The treasury policy defines the guidelines set by the Board of Directors on how finance and treasury operations are carried out and how financial risks within the Group are managed. The guidelines aim to ensure that the Group's financial risks are kept at an acceptable level.

Currency transaction exposure for Ahlstrom-Munksjö which arises from commercial and finance-related transactions and payments in a currency other than an operation's functional currency i.e. from internal purchases, sales between manufacturing units and market companies, external sales and purchases as well as from financing transactions in foreign currencies are hedged on a net exposure basis in accordance with the rules set out in the Treasury Policy. The Group's risk management strategy in terms of currency risk is to hedge 75% (+/-10%) of the forecasted cash flows for a period up to 9 months if the total exposure to forecasted net flows of foreign currency exceeds the equivalent of 2% of the total turnover of Ahlstrom-Munksjö.

Group's income statement and balance sheet are both exposed to foreign exchange fluctuations, as these affect the translation of subsidiaries' assets and liabilities denominated in foreign currencies. The Group aims to minimize currency risk related to translation exposure by aiming to balance assets and liabilities of subsidiaries so that the foreign exchange risk is minimized in the consolidated balance sheet, and Spa Holdings 3 Oy's Board of Directors have decided to allow for the use of non-derivative financial instruments such as foreign currency borrowings to hedge foreign currency risk on net investments in foreign operations. Derivative instruments are not allowed to be used to hedge this risk and equity hedging needs to be approved by the Board of Directors.

In accordance with the current treasury policy, in order to mitigate funding risk, the Group aims to spread its debt across different lenders and different forms of financing. The Group aims to ensure that the average maturity of the long-term finance should be at least 2 years.

Spa Holdings 3 Oy's Senior Secured Notes and Term Facilities contain certain customary covenants related to indebtedness and other limitations.

Liquidity risk is the risk that Group will not have sufficient funds to pay foreseen committed obligations in addition to unforeseen expenditures. In order to mitigate this risk, Group Treasury monitors the Group's cash pools, bank agreements and liquidity to ensure that there is sufficient liquidity at all times. The Group's cash accounts are included in the cash pools.

APPENDIX 2: KEY FIGURES

Certain of our key figures are not accounting measures defined or specified under IFRS and therefore are considered as alternative performance measures. We present these alternative performance measures as additional information to the financial measures presented in the consolidated financial statements prepared in accordance with IFRS. Certain of the adjustments and estimates underlying e.g. Adjusted EBITDA are forward-looking by nature and therefore subject to a number of assumptions about the timing, execution and costs associated with implementing the underlying initiatives. Such assumptions are inherently uncertain and are subject to significant business, economic and competition risk and uncertainties as further described under the heading "Forward-Looking Statements".

We present alternative performance measures because we believe that they are helpful to investors as measures of our operating performance and ability to service our debt, and that they and similar measures are widely used by certain investors, securities analysts and other interested parties as supplemental measures of performance and liquidity. Alternative performance measures should not be viewed in isolation or as a substitute for revenue or net result for the period or any other performance or liquidity measures presented in our IFRS financial statements or any other generally accepted accounting principles or as a substitute to cash flows from operating, investing or financing activities. Companies do not calculate alternative performance measures in a uniform way, and therefore Ahlstrom-Munksjö Holding's alternative performance measures may not be comparable with similarly named measures presented by other companies. The alternative performance measures we present may also be defined differently than the corresponding terms under our debt financing arrangements.

Some of the limitations of these alternative performance measures are that:

- they do not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;
- they do not reflect changes in, or cash requirements for, our working capital needs;
- they do not reflect the significant interest expense, or the cash requirements necessary, to service interest or principal payments on our debt;
- they do not reflect any cash income taxes that we may be required to pay;
- they do not reflect the impact of earnings or charges resulting from certain matters we consider not to be indicative of our ongoing operations;
- although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often need to be replaced in the future and EBITDA-based measures do not reflect any cash requirements that would be required for such replacements;
- they may include adjustments for non-cash items and not adjust for all items that impact cash flows;
- some of the items that we eliminate in calculating certain EBITDA-based measures reflect cash payments that were made, or will in the future be made; and
- other companies in our industry may calculate these measures differently than we do, limiting their usefulness as comparative measures.

Alternative performance measures are unaudited.

APPENDIX 3: UNAUDITED VOLUNTARY PRO FORMA FINANCIAL INFORMATION

Basis of Compilation

General

The following voluntary pro forma combined financial information (the "pro forma Information") is presented for illustrative purposes only to give effect to the acquisition of Ahlstrom-Munksjö Oyj ("Ahlstrom-Munksjö") by SPA Holdings 3 Oyj (the "Issuer", "parent company") on the business performance of SPA Holdings 3 Group ("Ahlstrom-Munksjö Holding", the "Group") and the financing for the acquisition to Ahlstrom-Munksjö Holding's financial information as if the acquisition had been completed at an earlier date. The pro forma Information is unaudited.

The unaudited pro forma combined income statements ("pro forma income statement") for January-June 2021 and for the year 2020 give effect to the acquisition as if it had taken place on January 1, 2020. Pro forma adjustments that do not have a continuing impact on Ahlstrom-Munksjö Holding's results are presented in the pro forma income statement for the year 2020. No balance sheet is presented as the June 30, 2021 consolidated balance sheet reflects the impacts of the acquisition and the financing for the acquisition.

The pro forma information has been presented for illustrative purposes only. The pro forma Information addresses a hypothetical situation and is not therefore necessarily indicative of what the combined companies' financial performance would have been had the acquisition been completed on January 1, 2020. The pro forma information does not either purport to project the operating results of the combined companies as of any future date.

The pro forma income statements do not reflect any expected cost savings, synergy benefits or future integration costs that are expected to be generated or may be incurred as a result of the acquisition. The pro forma effective tax rate differs from the historical tax rates of Ahlstrom-Munksjö Holding and Ahlstrom-Munksjö and from the expected 2021 effective tax for the Group as pro forma income tax impact is calculated based on the deductibility of the adjustment and using the actual enacted applicable tax rates in the respective jurisdiction. Further actual effective tax rates may also be significantly different in the future depending on the post-acquisition activities, including cash needs and funding activities, geographical mix of income and integration and tax planning strategies.

The pro forma information presented herein is prepared based on the historical results of Ahlstrom-Munksjö Holding and Ahlstrom-Munksjö prepared in accordance with IFRS and on a basis consistent with the EU prospectus regulation's pro forma guidance. The pro forma Information has been prepared on a basis consistent with the accounting principles applied in Ahlstrom-Munksjö Holding's consolidated interim report.

The acquisition of Ahlstrom-Munksjö has been accounted for as business combination using the acquisition method of accounting under the provisions of IFRS with Ahlstrom-Munksjö Holding determined as the acquirer. The acquisition method of accounting applies the fair value concepts and requires, among other things, that the identifiable assets acquired and liabilities assumed in a business combination are recognized at their fair values as of the acquisition date, with any excess of the purchase consideration over the fair value of identifiable net assets acquired recognized as goodwill.

The pro forma information reflects the application of pro forma adjustments that are based upon certain assumptions, described in the accompanying notes herein, that management believes are reasonable under the circumstances. Pro forma adjustments to historical financial information are prepared to give pro forma effect to events that are directly attributable to the acquisition and the financing for the acquisition and are factually supportable. Actual results may differ materially from the assumptions within the accompanying pro forma Information.

For more information regarding the acquisition of Ahlstrom-Munksjö from the Q1/2021 interim report.

Historical Financial Information

The pro forma Information has been derived from the following historical financial information:

- Ahlstrom-Munksjö's audited consolidated financial statements for the year 2020 and from the accounting records of Ahlstrom-Munksjö for period ended February 4, 2021 (the "acquisition date");
- Ahlstrom-Munksjö Holding's audited financial statements for the year 2020 and unaudited interim report for the January-June 2021.

This pro forma information should be read in conjunction with note 4 in the appendix 1 of the interim report.

Other Considerations

The pro forma adjustments which have continuing impact on the Ahlstrom-Munksjö Holding's results, have been translated to euros using historical average exchange rates in 2020 and for separate quarters in 2021 for respective currencies. The pro forma adjustments for income taxes have been calculated based on the tax deductibility of the underlying pro forma adjustments in the respective jurisdiction and accordingly, tax rates used for pro forma purposes differ depending on the nature of the underlying pro forma adjustment.

All amounts are rounded and presented in millions of euros unless otherwise noted. Accordingly, in certain instances, the sum of the numbers in a column or row may not conform exactly to the total amount given for that column or row.
