5 Q\&A

## Outlook for 2013

The market development and demand has recovered after the holiday shutdowns. However the market situation in the business areas Release Liners and Graphics and Packaging remains challenging. The anticipated decrease in the result, compared to last year, for these two business areas is expected to exceed the positive impact of the synergy benefits and stand-alone savings.

The result for the fourth quarter will be affected by non-recurring items due to the measures taken to achieve synergy benefits, as well as the programme for improving profitability in the business area Graphics and Packaging.
